Lowes, John Livingston, 1867– Convention and revolt in poetry. 1919. 346p. Houghton $2.25

The purpose of these essays originally given as the Lowell institute lectures for 1918 is to point out the continuous action and reaction in English poetry as convention breaks away before revolt which again crystallizes into convention. The author maintains that "genius of the highest order is far more apt to disclose the unexpected resources of whatever vehicle of expression it falls heir to than to spend itself upon a fabrication of the new."

811 American poetry: Works of individual poets

The chief editions in which the standard English and American poets appear are described briefly in order to bring out individual characteristics of format and content.

Cambridge edition, Houghton (cr. 8vo.) cloth, $3.50 each, complete in one volume. Each volume contains a portrait of the author, a biographical sketch by the editor, a detailed table of contents, brief headnotes describing origin of the respective poems, a few explanatory notes and indexes of

titles and of first lines. The double column arrangement is used. The paper is excellent, the type clear, and the books are well bound.

Globe edition, Macmillan (12mo) cloth, $2.50 each. These are complete texts, with numbered lines and copious footnotes which make the edition valuable for reference. A sketch of the author, a glossary, and a classified table of contents are included. There are no indexes. The paper is of good quality, not quite opaque, but the clear type largely overcomes this defect. The binding is attractive and wears well.

Household edition, Houghton (cr.8vo) cloth, $2.25 each. These are excellent texts, less expensive than the Cambridge and Globe editions, in larger type, with a portrait of the author, numerous well selected illustrations and a brief biographical sketch. The text is usually arranged in double columns, and the lines are numbered inconspicuously. Brief notes form an appendix and there are indexes of first lines and of titles. Good paper is used and the books are substantially bound.

Oxford Standard edition, Oxford university press (12mo) cloth, $1.50 each. These texts are prepared by eminent scholars. Each contains a portrait of the author and occasionally illustrations of early title-pages from the separate editions of the poems. The lines are numbered. Detailed table of contents, biographical introduction, chronological table, and an index of first lines are included. The paper is of good quality, the type clear and well leaded.

Riverside edition, Houghton (cr.8vo) Not complete in one volume; sold only in sets. The title-page is descriptive of the contents of the volume, only the half-title indicating that the volume is one of a set. The introduction is chiefly descriptive of the author's work with little biographical information. There are no text references to the detailed notes which form an appendix. Indexes of contents and of first lines appear in the final volume of each set.

ken, Conrad Potter, 1889– Priapus and the pool, and other poems. 1925. 151p. Boni & Liveright $2

A collection of twenty-one poems, the title poem of which has been previously published in a limited edition. Other volumes of his poems are *Charnel rose* (Four seas, 1922. $2) *Jig of Forslin* (Four seas, 1916. $2) *Nocturne of remembered spring* (Four seas, 1917. $2) *Punch* (Knopf, 1921. $2)

A poet whose work will be as capriciously popular as his own capering. There are broad sweeping impressionistic strokes, there is triumphant swing and cynical strength, but there is also carelessness of fine detail and vanishing enthusiasm and even sordidness at times which will repel many even though his peculiar power is recognized.

8 25–21048

lington, Mrs. **Hilda (Doolittle)** 1886– Collected poems of H. D. 1925. 306p. Boni & Liveright $2.50

All the poems by this early leader of the imagist group are now presented in one volume. Quick response to nature, emotion and beauty, set in a classic atmosphere, characterize this unusually fine work.

25–9543

Aldrich, Thomas Bailey, 1836–1907. Poems. Household ed. Rev. 1907. 504p. port. Houghton $2.25

His predilection is for the picturesque, for romance combined with simplicity, purity and tenderness of feeling, touched by fancy and occasional lights of humor. His poems come also in a 2v. Riverside ed. (Houghton, $4)

Benét, Stephen Vincent. Heavens and earth. 1920. 97p. Holt $2

4411 20–21994

—— Tiger joy. 1925. 119p. Doran $1.75

The greater part of this book of verse is devoted to ballads of real vitality. Mr. Benet's rhythms in these poems are singularly well suited to the vigor of his subject matter, particularly in the ballad of King David, which won the *Nation* poetry prize. There are also some charming songs and sonnets.

4412 25–19307

Benét, William Rose, 1886– Moons of grandeur. 1920. 176p. Doran $2

The poet has gone on a bypath from contemporary interests and found his material in the ancient days of Egypt and in the Renaissance in Italy. *The Falconer of God, and other poems* (Yale, 1914. $1.35) is the first and possibly the least sure of his work.

4413 20–19072

Branch, Anna Hempstead. The shoes that danced, and other poems. 1905. 201p. Houghton $1.65

The title piece, a fifty-page drama, and some fifty minor poems make up the volume. The verse is thoughtful and smooth and the range of subjects wide. In *Rose of the wind, and other poems* (Houghton, 1910. $1.65) the title poem, which is a little fairy play, possesses, with the other eleven poems, much distinction, revealing genuine poetic talent.

4414 5–11611

Bryant, William Cullen, 1794–1878. Poetical works. Roslyn ed., with chronologies of Bryant's life and poems, and a bibliography of his writings by H. C. Sturges, and a memoir of his life by R. H. Stoddard. 1903. 418p. Appleton $3.50

4416 25–20738

Bynner, Witter, 1881– Caravan. 1925. 77p. Knopf $1.50

Fifty poems which display neither more nor less than usual of Mr. Bynner's talent, but which, by means of a wide variety of subject matter and metrical arrangements, achieve distinction as a collection.

—— and **Hovey, Richard.** Songs from Vagabondia. 1909. 54p. Small $1.25

His "hearty goodfellowship and warm companionship combine well with Carman's wandering minstrelsy."

Hyde, Douglas, ed. and tr. Love songs of Connacht, being the fourth chapter of the songs of Connacht. 1909. Unwin 3s6d

The first book that made known to readers who knew no Irish, the poetry of the Irish country people. There have been other translations but Dr. Hyde's are free from the formal eighteenth century style, giving the note of fanciful or fantastic lyric and singing melancholy without which no Irish poetry can live. Each poem is preceded by a bit of comment in finest prose and there is a section at the end which contains delightful literal prose translations of certain of the songs.

Keats, John, 1795–1821. Complete poetical works and letters. Cambridge ed. 1899. 473p. port. Houghton $3.50

This volume contains all of Keats' poems and a large collection of his letters. The text of the poems has been carefully collated with copies of the first editions, and various other manuscripts and editions have been consulted. Ibsen

Ibsen, Henrik, 1828–1906. Works; tr. by William Archer and others. 1911-12. 13v. ports. Scribner $2 each

The authorized translation. Ibsen's dramas fall into three groups: historical, which may be represented by "The pretenders," and "Emperor and Galilean"; poetical, by "Peer Gynt"; and sociological, by "A doll's house," "Ghosts" and "Pillars of society." Among the more purely psychological plays are "The wild duck," "The lady from the sea" and "The master builder."

—— Doll's house, and two other plays; tr. by R. F. Sharp and E. M. Aveling (Everyman's library) 1910. 284p. Dutton 80c

"A doll's house" is now one of the classics of women's emancipation; "The wild duck" is a satire on the well meaning reformer, perhaps directed toward Ibsen himself; "The lady from the sea" is another variation on woman's demand for freedom. The underlying struggle, however, in all of these, and the tense relation between characters gives them the interest of keen psychological studies.

This famous French poetico-satirical allegory of the thirteenth century combines a fanciful dream tale of the trials and triumphs of love (by Lorris) with a continuation of the allegory in an elaborate treatise on the scientific and political questions of the day (by Meung). The present volume is an appreciative translation of this tale which first presents us with pictures of medieval everyday life, warm and colorful. Each volume is prefaced by a summary of the chapters in that volume, and a table of chapters is at the end of each.

Cary, Henry Francis, 1772–1844. Early French poets; introd. by T. E. Welby. (Campion reprints) 1925. 219p. A. & C. Boni $2

A reprint of a work, originally published in 1846, by the honored translator of Dante. The period covered by the poets included extends from 1201 to 1555,—from Thibaut, King of Navarre to Jean Bertaut more than a hundred years after Villon. A charmingly refreshing, original and somewhat archaic manner of criticism intermingles with his translations from the poets. Although much research work has been done in connection with the same period since Cary's day, his little volume gives the atmosphere of intimacy which he himself enjoyed in the library at Versailles whose books had formerly belonged to the kings of France.

Ariosto, Lodovico, 1474–1533. Orlando furioso; tr. by W. S. Rose. New ed. (Bohn's illustrated library) 1892. 2v. port. Bell o.p.

The *Orlando Furioso* gave full and final expression to the fifteenth century in its social, political, and clerical turmoil. The poem has three chief sources of interest: The seige of Paris and the final rout of the Saracen army, The insanity of Orlando, and the loves of Ruggiero and Bradamante. It was written with the glorification of the House of Este in mind, and was a continuation of the *Orlando Innamorato* by Boiardo who with Ariosto and Tasso put the old chivalric romances into classic form.

It is a selection of the most effective and the most familiar of the fables with numerous black and white illustrations. The epic poem of Finland brought together by means of collecting the peasant tales and old ballads and arranging them to constitute a connected tale of the exploits of national heroes. The first complete English translation of this national epic of Finland, its Military song-cycle, recording the war of 1808-9, setting forth its battles, its episodes and characters. 900 HISTORY

901 Philosophy. History of civilization

"The History of Civilization series (Knopf, variously priced) promises to be perhaps the most important contribution so far undertaken toward the task of organization and systematization of the social studies . . . The best works of France, Great Britain, and some other countries are contributing from their own specialties and are attempting to bring their work in line with the contributions from neighboring fields and with the results of general sociology. Including all of the volumes of the important French collection, L'Evolution de l'Humanité, the English library contains additions and improvements which will place it above its continental counterpart . . . Arranged so as to include all manifestations of human culture, the series follows roughly a combined historical and geographical plan." The series is being prepared under the general editorship of C. K. Ogden of Magdalen college, Cambridge. Dr. Harry Elmer Barnes, professor of history at Smith college is the consulting American editor. Distinguished historians, both European and American, are contributing volumes in their several departments. Two hundred volumes are projected, approximately thirty of which have appeared.

In Dr. Barnes' opinion, history has little value unless it teaches man to disabuse his mind of "fatal worship of an inadequate and archaic past" and furnishes a stimulus for interest in the advancement of culture. The aim of this work is to analyze the historian's difficulties, to discuss briefly recent "contributions to a more dynamic history," and to introduce the reader to some problems raised by certain of the "dynamic historians."

Mommsen, Theodor, 1817–1903. History of Rome; tr. by W. P. Dickson. (Everyman's library) 1911. 4v. Dent; Dutton 80c each

"Pre-eminently a constitutional history, it endeavors to describe the growth of the State. It cares less for remarkable feats of valor than for the strategic and political movements by which feats of valor are turned to account. Mommsen at once dazzles his readers by his brilliancy and overwhelms them by his impetuosity. He shows also a masterly gift in the delineation of character, though his delineations are entertaining rather than convincing. While his pages glow with the fervor and brilliancy of a great advocate, his partisanship is so obvious that his authority on any disputed point cannot be regarded as conclusive."

"Universally considered the most vivid and faithful picture we have of events in the 14th century. No more graphic account of any age has ever been produced. Froissart was not critical. He was simply a chronicler. The great value of the work, therefore, is in the fact that it holds up a mirror and enables us to see the 14th century just as it seemed to the most observing and inquisitive man of that age. As he was himself a votary of pleasure, the sole object of his chronicles seem to have been to give pleasure to his readers. As a picture of the most favorable side of chivalry the work has no equal." Can also be obtained from Dutton, Everyman's library, 80c.

940.3 European war: General history

Buchan, John, 1875– History of the great war. 1922. 4v. ports. maps. Houghton $20

A most interestingly and lucidly written account. Intended as "history on a large scale," it omits many details yet nothing that is essential to an understanding of the main events of the war. Written by an Englishman for English readers, it purposely gives more space to the part played by the British, but has full appreciation for America's participation. An appendix contains terms of the armistices. There is a separate index of the military and naval units of all countries engaged in the war.

Thomason, John William, 1893– Fix bayonets! 1926. 245p. illus. Scribner $3.50

The author of this book is first of all an artist but spirited as his drawings are they are well matched by the text. The terse, direct sentences set the heart beating fast as those men march into battle, thirsty, fasting, footsore, almost asleep on their feet, until they are galvanized into fury by the sight of their falling comrades. The war through Captain Thomason's eyes is not a pretty sight; it is grim murder.

Beginning with Ireland in legendary times Mr. Gwynn, a well-known Irish littérateur, has written a readable and unbiased history of Ireland down to the birth of the Irish Free State. In his *Ireland* (Scribner, 1925. $3) he essays to make 20th century Ireland a comprehensible phenomenon to the rest of the world. "Undoubtedly the most brilliant and the most popular history ever written in the English language. Though it covers a period of only seventeen years, yet the splendor of the author's style has caused it to be more universally read than any other history in English literature. Macaulay was, however, always the victim of an intense partisan spirit. Lecky, William Edward Hartpole, 1838–1903. History of England in the eighteenth century. Cabinet ed. 12v. Longmans 7s6d each

An admirable work in which the author neither deals with events in chronological order nor treats of the details of personal, party or military affairs. He attempts rather "to disengage from the great mass of facts those which relate to the permanent forces of the nation, or which are some of the more enduring features of national life." It contains a very impartial treatment of the American Revolution.

The period covered extends from the accession of Queen Victoria to the Berlin congress. "The work of a writer who was at once a journalist, a novelist, a member of Parliament, and an active observer of political affairs. For his materials he has drawn from a capacious memory and from contemporaneous events. Indeed, his history may be said to be the work of a skilful journalist rather than a practised historian. But it has substantial merits. The admirable accounts it gives of men who have directed English political affairs are among the most fascinating pages of modern historical literature."

Morel, Edmund Dene, 1873– Black man's burden. 1920. Huebsch $1.50

A graphic account which shows African atrocities, the wrongs inflicted by the white peoples upon the black, gives practical suggestions for a sane policy, and points out the reflex action of African conditions upon European affairs. J. H. Harris in *Africa: slave or free?* (Dutton, 1920. o.p.) writes from the religious rather than from the

political view but is quite as vehement in condemning the abuses of white rule.

Adams, James Truslow, 1878– Founding of New England. 1921. 482p. maps. Atlantic monthly $5

This excellent short history of early New England shows how the religious factor in the early settlement period has been overestimated to the neglect of those economic factors which played a very considerable part in the development of all the colonies. It is continued by his *Revolutionary New England* (Atlantic monthly, 1921. $5) which carries the narrative from 1691 to the Declaration of Independence. It supplies fresh facts concerning the causes leading to the Revolution. Reproductions of cartoons from contemporary periodicals help to re-create the atmosphere of the time. *New England in the Republic 1776-1850,* (Little, Brown, 1926. $5) follows the development up to the period when the current of nationalism swept the New England states into the swift movement of a genuinely national life. This volume is concerned with the life of the people as expressed in forms other than political to a greater extent than the previous volumes. Cartoons, broadsides, documents, and illustrations add to the reality of the narrative. Continuous reference to original sources is made in footnotes, but this in no way detracts from the pleasure of the general reader.

cious account by the sometime Pepysian librarian at Magdalene college, Oxford. J. R. Tanner's *Mr. Pepys* (Harcourt, 1924. $2.75) is a careful selection of quotations from the *Diary* woven into a narrative of his life and a portrait of the man. The most valuable work extant for an understanding of the court and times of Charles II. The events, characters, follies, vices, and peculiarities of the age are presented in true and lively colors. Its perennial appeal will remain in its revelation of the character of the author—a capable public man, a lover of society, a man of the world, a snob, a child, and lovable withal. Spirited, yet quaintly naive, it is one of the most diverting books in the world. Begun in 1660, it continues for about nine years.
